ISA Reports Settlement of ISA Energia Brasil Share Offering

Interconexión Eléctrica S.A. E.S.P. (ISA) informs the market, further to the relevant information disclosed on July 23, 2026, that ISA Energia Brasil S.A., an ISA company dedicated to the electricity transmission business in Brazil, announced today the settlement of its public offering of new preferred shares conducted under the automatic registration regime before the Comissão de Valores Mobiliários (CVM) and targeted exclusively at existing shareholders and professional investors.

Additionally, ISA Capital do Brasil S.A., an ISA-controlled company and controlling shareholder of ISA Energia Brasil, actively supported the transaction from its structuring phase through execution, reaffirming its confidence in ISA Energia Brasil's growth strategy and value creation potential. However, due to the strong demand observed during the bookbuilding process and the allocation procedure, no shares were allocated to ISA Capital do Brasil.

As a result, the following is reported:

- The offering was highly successful, with demand significantly exceeding the number of shares offered.
- The final offering price was BRL 27 per share, in line with the stock's average trading price over the last 12 months. This price enabled the company to raise approximately BRL 1.2 billion.
- The outcome of the transaction reflects the market's strong recognition of the value of our assets and is evidenced by the development of a robust, high-quality shareholder base.
- ISA Capital do Brasil S.A.'s economic interest in ISA Energia Brasil S.A. decreased from 35.82% to 33.55%, while maintaining control of the company. This change is consistent with a strategy aimed at strengthening the shareholder base and increasing share liquidity.
- ISA Capital do Brasil S.A. retains the same voting rights through its ownership of 96.93% of ISA Energia Brasil S.A.'s common shares.
- ISA Energia Brasil S.A. will use the proceeds to meet financial commitments related to the Madeira shareholding restructuring process, previously disclosed to the market, and to accelerate investments in reinforcement and improvement projects aimed at enhancing value creation ahead of future tariff reviews.

The transaction achieved its original objectives, strengthening both the capital structure and shareholder base of ISA Energia Brasil S.A. In addition, it is aligned with ISA's corporate strategy by enabling the organization to pursue significant growth opportunities and enhance its future investment capacity.
